L2- As a Linux root user Create Files/Directory in the same Instance and change the ownership to a new use

STEP 1- LAUNCHING AN EC2 INSTANCE

STEP 2- CONNECT TO THE INSTANCE

Connect the ec2 instance in ubuntu server

STEP3- ADDITION OF DIRECTORY

1. CHANGE THE USER

Sudo su

2. ADD DIRECTORY

Sudo mkdir directory name

3. ADD FILE

Sudo touch file1

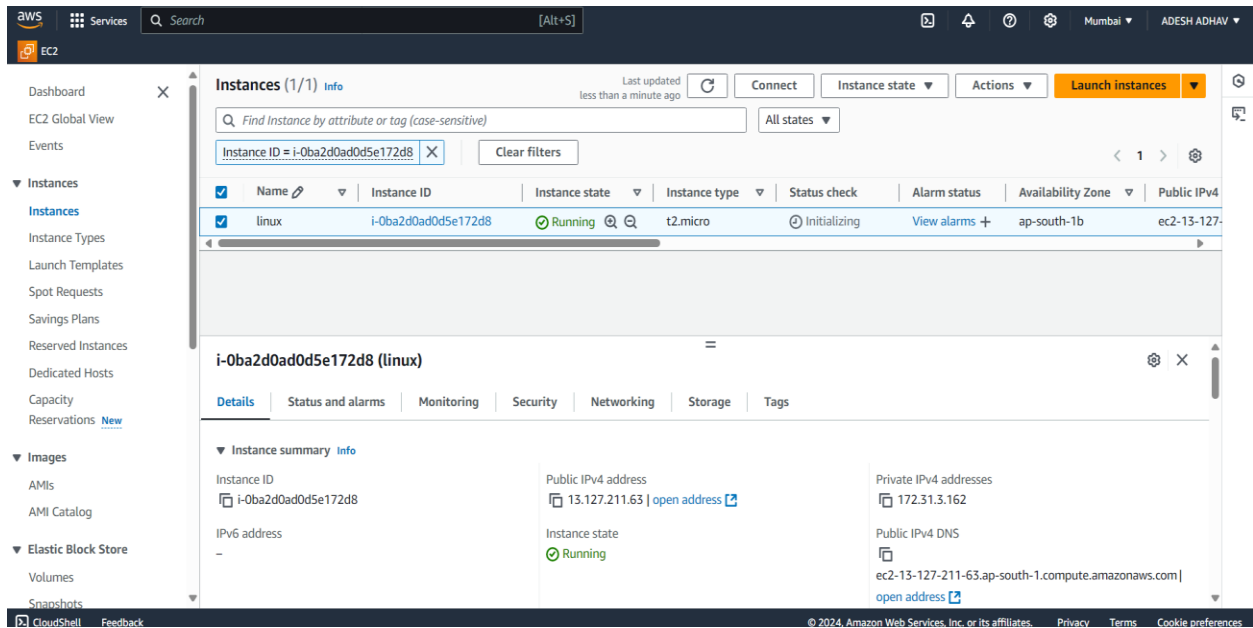

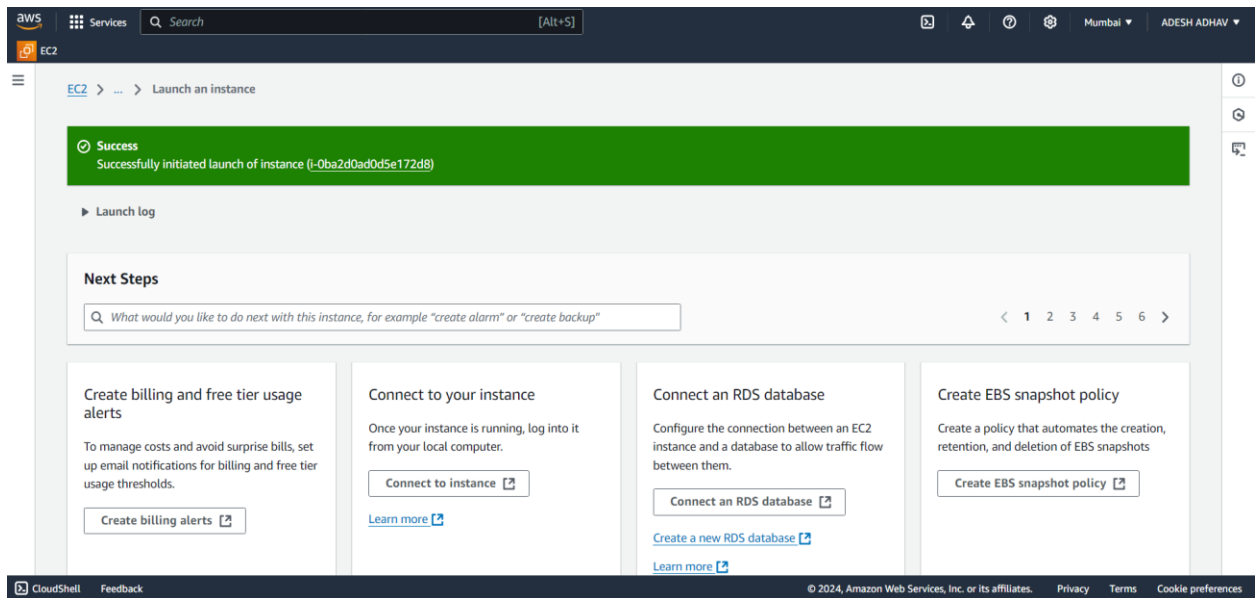

4. ADD NEW USER

Sudo adduser user name

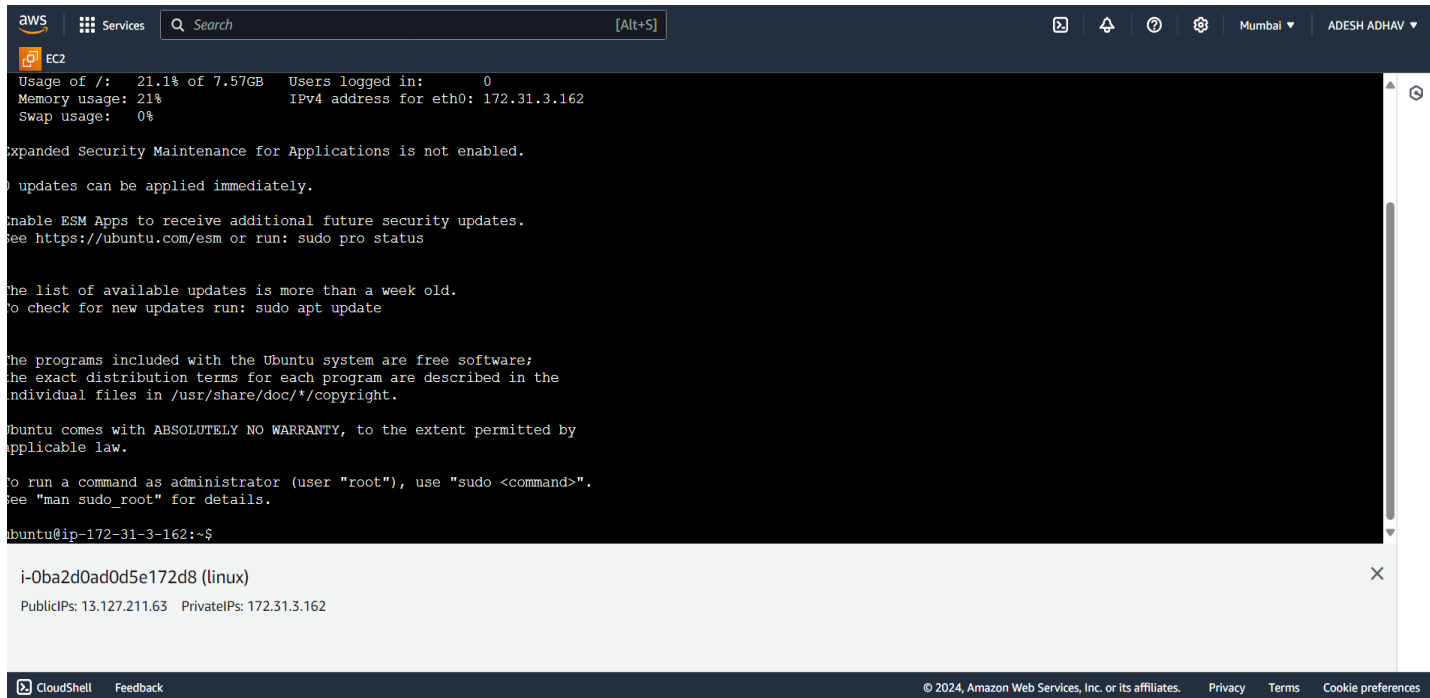

STEP4-Change the ownership

Sudo chown newuser directory/file name

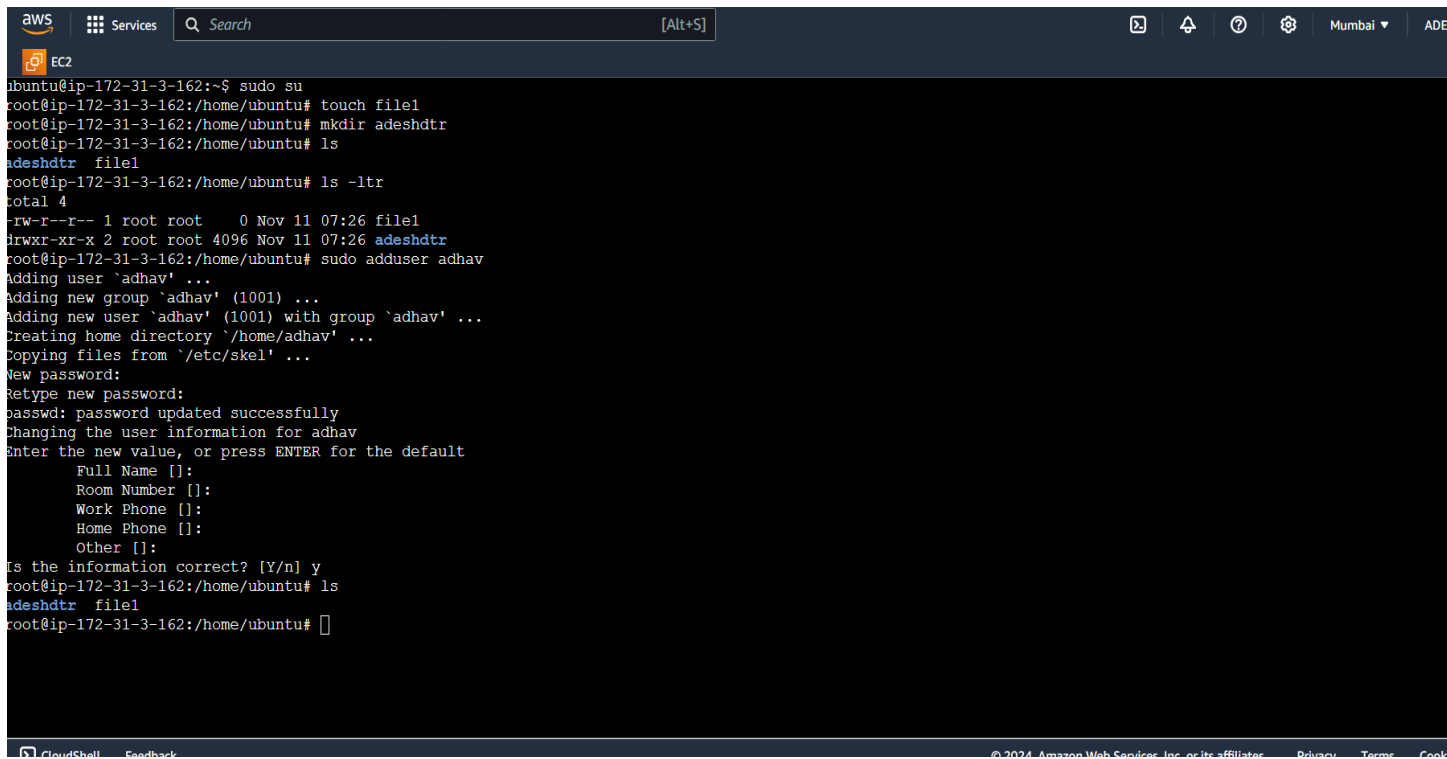

- **INSTANCE CREATED**

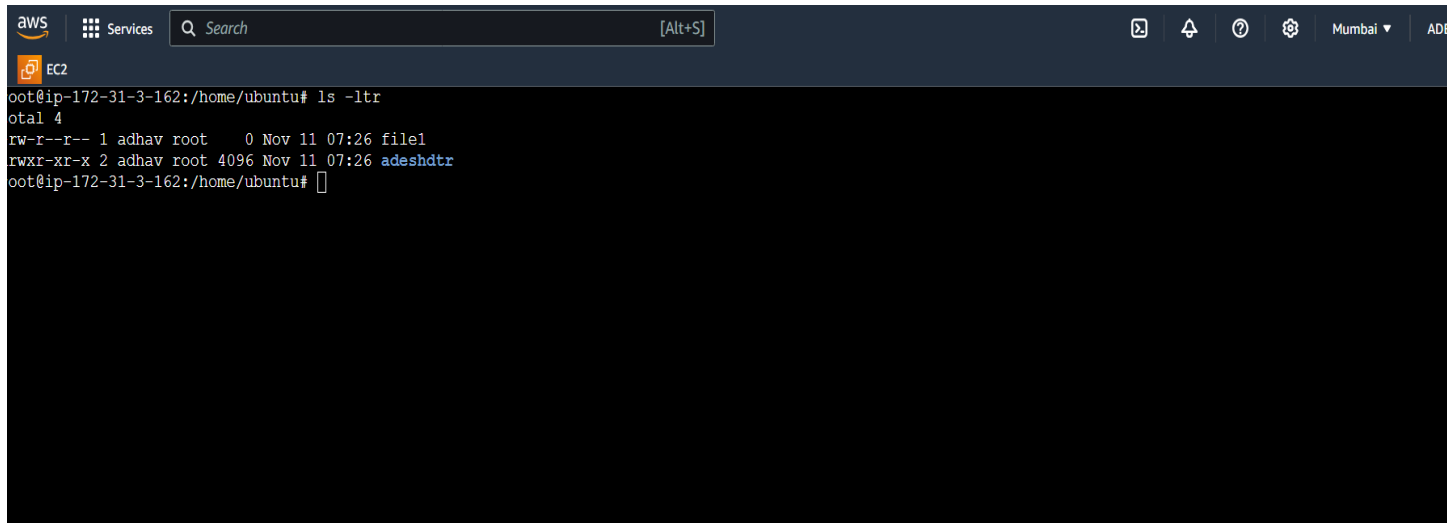

- **CONNECTED TO THE INSTANCE**

- **ADDED DIRECTORY,FILE AND NEW USER**

- **CHANGED THE OWNERSHIP OF FILE AND DRECTRY**

The screenshot shows an AWS Management Console terminal window. The top bar includes the AWS logo, a 'Services' menu, a search bar, and a '[Alt+S]' shortcut. The terminal title is 'EC2'. The command prompt shows the user 'root' at IP 'ip-172-31-3-162' in the '/home/ubuntu' directory. The command 'ls -ltr' is executed, showing two files: 'file1' and 'adshdtr'. The output for 'adshdtr' shows it is owned by 'adhav root' with permissions 'rwxr-xr-x' and size '4096'. The prompt then returns to the user.

```
oot@ip-172-31-3-162:/home/ubuntu# ls -ltr
total 4
-rw-r--r-- 1 adhav root    0 Nov 11 07:26 file1
-rwxr-xr-x 2 adhav root 4096 Nov 11 07:26 adshdtr
oot@ip-172-31-3-162:/home/ubuntu#
```
