L4 - Create Python Console Application to read the contents of .json file and print in the VS Code python console output

STEP 1: INSTALL VSC

STEP 2: INSTALL PYTHON

(CHCEK THE PYTHON INSTALLATION)

STEP 3: CREATE json FILE

```
import json

user = {
"name" : "adesh"
}

data = json.dumps(user)

file = open('users.json','a')
file.write(data)
file.close
```

STEP 4: READ THE JSON FILE

```
import json
f = open('users.json','r')
data = f.read()
f.close()
print(data)
```

```
PROBLEMS   OUTPUT   DEBUG CONSOLE   TERMINAL   PORTS   AZURE

C:\Users\KOMAL\Desktop\python> python --version
Python 3.12.8

C:\Users\KOMAL\Desktop\python>
```

```python
import json

user = {
    "name" : "adesh"
}

data = json.dumps(user)

file = open('users.json','a')
file.write(data)
file.close
```
